ANY DIRECTION. AS LONG AS IT'S YOUR OWN.

**STYLE THAT LASTS.
TECHNOLOGY THAT IMPRESSES –
WITHOUT COMPROMISE.**

Sometimes, one glance at the road is enough to understand why people ride engine cycles. It's not just about speed. It's about the feeling of being in control and yet free. That's where Brixton Engine cycles comes in.

When the brand began designing a engine cycle, the idea quickly became clear: 'Classic Cool'. Not retro at any price, but timeless designs that never go out of fashion. Engine cycles that look like they have a history – and yet are ready for the next ride. Whether 125, 250, 500 or 1200 cc – every model embodies this idea: minimalist, striking, unmistakably Brixton.

But in the end, it's all about the ride. The feeling when the starts, when every turn comes naturally. A riding experience that doesn't sugarcoat anything, but delivers exactly what you're looking for: directness, ease, freedom.

Brixton puts it simply: 'Any direction, as long as it's your own.'
No matter where you're going – the main thing is that it's your way.

Classic Range

The good old days are not gone. They live on – in the rhythm of two wheels. With the Classic Range, Brixton Engine cycles revives the golden era of engine cycling and carries it into the present.

These machines are more than just technology. They evoke memories of clean lines and sounds whose sound tells stories. They carry the spirit of past decades, but they do not dwell in nostalgia. They are built to write new chapters.

Whether it's your first ride or a long-standing passion, everyone will find their match in the Classic Range. Not a copy, but a tribute. A piece of tradition that lives on – unmistakably, uncompromisingly Brixton.

WHERE STRENGTH MEETS FORM:

Cromwell 1200 X

A ENGINE CYCLE WHOSE COMPONENTS DELIVER ON THE PROMISE OF STRENGTH.

DESIGN

It is reminiscent of the classic school of engine cycle design – uncompromising in its lines and impressive in the presence of its 1222 cc. It is impossible to miss on the road, not as an obtrusive statement, but as a confident appearance. Anyone who has experienced it in motion will understand that you will be reluctant to park it again.

FEATURES

The Cromwell 1200 also demonstrates its high quality in terms of components. Bosch ABS, Nissin brakes, KYB shock absorbers, traction control, Pirelli tyres and a round TFT display are all included, as is the choice between Sport and Eco modes. This allows the rider to decide for themselves whether they want to tune the machine for efficiency or dynamics.

Cromwell

DESIGN

The Cromwell 125 is the bike for those who don't talk much, but just get going. Compact, casual, with a dash of self-confidence – just right for the city. Its distinctive Brixton tank references British cult design and makes it clear: this is no everyday vehicle, this is a character piece.

FEATURES

But the Cromwell 125 doesn't just look good, it can do the job too. With disc brakes, LED lights and modern fuel injection, it's technically on par – reliable, uncomplicated, ready for everyday use. Its smooth four-stroke engine takes traffic lights in its stride and handles winding side roads with a smile.

FELSBERG 125

Felsberg

URBAN, OFF-ROAD AND EVERYTHING IN BETWEEN

125

DESIGN

The Felsberg 125 responds to the call of the dirt track as if it were its natural terrain. With its studded tyres, it seeks out the uneven ground, the challenge beyond the asphalt. But it doesn't stay there. It finds its way just as naturally through the urban jungle, where traffic lights become rhythm and urban canyons become the horizon. A motorbike that carries the promise of freedom in two worlds.

FEATURES

The Felsberg 125 also shows its character in the details. Reinforced rear suspension, protective grille in front of the headlight and a discreet windscreen are more than just technical additions – they are visible signs of its robustness. Equipped in this way, it not only remains resilient, but also retains that unmistakable aura that makes machines companions.

BUILT
FOR
ROAD
AND
DUST.

Crossfire range

The 'X' on the tank is more than just a symbol. It represents an attitude, rock "n" roll condensed into metal.

With the Crossfire series, Brixton brings this spirit to the streets of today – and tomorrow. Every ride is a performance, every impression lasts.

Crossfire 500 Storr

BUILT FOR BEYOND

CROSSFIRE 500 STORR

CROSSFIRE 500 STORR

DESIGN

The Brixton Storr is an engine bike that wants to go beyond – to where the asphalt ends. It is not an uncompromising off-roader, yet it is more than just a road engine bike. A border crosser between worlds, built for all those who not only want to ride the road, but also want to discover it.

FEATURES

With its long suspension travel, upright seating position and knobby tyres, it embodies adventure without shouting about it. An engine that is ready when the dirt road beckons and remains confident when everyday life calls.

CONCLUSION

The Storr does not seem like a machine you have to own, but rather one you want to accompany. A vehicle that promises freedom without dramatising it – and that is precisely why it sets your wanderlust in motion.

CROSSFIRE 500 X

Crossfire 500 X

===== FREEDOM AS A DRIVING FORCE =====

Crossfire 500

X

DESIGN

The Crossfire 500 X is an engine bike that doesn't push itself forward. It brings the same overall package to the road as its sister model, but it seems more relaxed, almost serene. The handlebars are wider, the seat is flatter, and the Pirelli tyres grip the asphalt more firmly. Even the number plate, classically mounted under the seat, fits into this image of a machine that has nothing to prove – and that is precisely what makes it so convincing.

FEATURES

Its performance remains raw and unadulterated. It takes kerbs in its stride, as well as dirt roads. Where other machines would protest, it remains silent. This attitude shapes its character: an engine that masters every driving situation with a naturalness that you won't forget on the road.

Crossfire 125 X

FUEL THE FIRE

CROSSFIRE 125 XS

Crossfire 125 XS

READY FOR AN ADRENALINE RUSH.

DESIGN

The Crossfire 125 XS proves that riding pleasure does not depend on size. Its compact chassis and striking silhouette give it a look that cannot be overlooked. With its 12-inch tyres, it combines agility and dynamism – characteristics that make it stand out, especially in everyday urban life.

FEATURES

Standard equipment includes a digital cockpit, LED lights and indicators. The combined braking system ensures reliable deceleration and gives the rider the necessary control, even in critical situations. This makes the Crossfire 125 XS a small engine bike with serious credentials.
